

HCA, Hospital Corporation of America, owns and operates approximately 164 hospitals and 111 freestanding surgery centers in 20 states and London, England – making us the largest healthcare system in the United States. Founded in 1968, Nashville based HCA recently marked its 40th anniversary.

Dr. Thomas F. Frist, Jr., HCA's co-founder and former chairman, is fond of saying *"putting patients first"* is the secret of success in healthcare. This simple statement quickly became the foundation of HCA's culture and passion for quality healthcare, and its spirit is succinctly captured in the first line of our mission statement:

***"Above all else, we are committed to the care and improvement of human life."***

#### DESCRIPTION:

At the company's founding in 1968, HCA was one of the nation's first companies to own and manage hospitals and outpatient centers. Currently, HCA, Inc. is composed of 164 hospitals containing 41,746 licensed beds, 111 ambulatory surgery centers, and 8 endoscopy centers in 20 states and England.

#### EMPLOYEES & CAREGIVERS:

HCA and its affiliates employ approximately 180,000 people. HCA caregivers perform approximately 5% of many healthcare procedures in the U.S.

#### MISSION & VALUES STATEMENT:

"Above all else, we are committed to the care and improvement of human life. In recognition of this commitment, we strive to deliver high quality, cost effective healthcare in the communities we serve. *In pursuit of our mission, we believe the following value statements are essential and timeless.*

- We recognize and affirm the unique and intrinsic worth of each individual.
- We treat all those we serve with compassion and kindness.
- We act with absolute honesty, integrity and fairness in the way we conduct our business and the way we live our lives.
- We trust our colleagues as valuable members of our healthcare team and pledge to treat one another with loyalty, respect and dignity."

#### STRATEGY:

Building on this foundation, HCA's strategy includes:

**Putting patients first:** HCA works to constantly improve the care we give our patients, implementing measures that support our caregivers, help ensure patients' safety and provide the highest possible quality.

**Investing in our communities:** HCA presently plans to invest more than \$1.5 billion per year to keep our hospitals modern and up-to-date technologically. We will also expand and add services to our hospitals and selectively acquire new facilities in order to better serve our communities.

**Focusing on leading hospitals in core communities:** HCA focuses on communities where the company is a leading healthcare provider.

**Improving local operations through efficient use of resources:** HCA employs industry-leading measures that enhance the performance of the company's local facilities, including organized group purchasing, efficient supply acquisition and distribution, shared administration and business services, and other initiatives that allow our hospitals and their communities to benefit from economies of scale.

**Building strong physician relationships:** HCA values strong relationships with local physicians, working to provide them a wide array of services and modern facilities in order to help them deliver the best possible care.
