Earn While You Learn

HCA | Training Program Outreach BUSINESSSIDEOFMEDICINE.COM

Does your training, compassion for patients, and work ethic set you apart from the crowd? If so, consider applying for the HCA “Earn While You Learn” Resident / Fellow Stipend Program.

HCA, the nation's leading provider of healthcare services with 164 locally managed hospitals and 111 outpatient surgery centers in 20 states, offers a unique opportunity to receive money now – while you are in training!

The HCA “Earn While You Learn” Stipend Program provides financial assistance to residents and fellows in primary care and selected medical specialties.

- ❖ Stipend funds are forgiven provided the recipient serves on the active medical staff at an HCA affiliated facility and also establishes and maintains his/her primary medical practice in the geographic area served by any HCA affiliated facility for 2 years
- ❖ There are no extra duty / call related requirements – not while in training and not while in practice

Stipend Recipients:

- ❖ Can choose to practice anywhere in the United States where there is an HCA affiliated facility and a need for their specialty
- ❖ Are not required to be employed by HCA
- ❖ Are still eligible to received a Recruitment Agreement (Income and Overhead Guarantee) or an Employment Agreement

Sound too good to be true? Read the testimonials from our stipend recipients on the back of this flyer.

You can browse HCA's physician careers website – www.PracticeWithUs.com – to see the practice opportunities that are currently available. Remember, openings change on a daily basis, so be sure to check the site often to find opportunities that align with your preferences.

Quotes from HCA Stipend Recipients

“The stipend program is excellent! It was very nice to get a little financial help toward the end of residency training, which is when there are lots of extra expenses (Board review courses, board review books, licensing, DEA fees, board certification exam fees, etc... the list goes on and on). This is a truly great way to help residents while helping to recruit quality candidates. I don't particularly see any deficiencies in the program. In all actuality; it was quite simple and painless. Let me know if there is anything I can do to help in the future.”

~ Victor Totfalusi, M.D., Internal Medicine Hospitalist, Westside Regional Medical Center, Cleveland Clinic, FL

“The HCA Stipend Program was one of the best decisions I made during my fellowship. Working with Kay Gerth and her staff was very easy and the benefit of having the stipend program far exceeds its monetary value. Less moonlighting and more time with family and friends are the biggest advantages in my book.”

~ John A. Flatt, M.D., Child Neurology, Vanderbilt University

“I think the program is excellent. I wouldn't change a thing. Keep up the great work!”

~ Michael Froehler, M.D., Interventional Neurology, Riverside Community Hospital

“The stipend program is a wonderful way to assist fellows as they finally complete their training.”

~ Jennifer Cook, Harvard Orthopaedic Resident, Insall Scott Kelly Fellow

“It sure helps to have extra money during your time of training. Great program! Thank you and everyone has been great to work with.”

~ Jeffrey Jackson, M.D., Orthopaedic Surgeon, St. Mark's Hospital

“The stipend program has been a positive and supportive experience and I highly recommend it.”

~ Stanford Neurosurgeon

“I would say that receiving the HCA stipend has made my final year of residency a lot easier. There are a lot of expenses during the final year of residency and the stipend has greatly reduced that burden. I didn't feel like it was committing me to a particular town or geographic location since there are so many HCA hospitals. I would be happy to recommend the stipend to potential candidates and I have told all the residents in my program.”

~ Dan Rackley, Urology Medical College of Georgia

“I really feel that it is the greatest thing that happened to me during my post-graduate training. It helped support me and my family and allowed me to concentrate more on my reading and training.”

~ Pulmonary/Critical Care, University of Missouri, Columbia

“The HCA stipend program has helped me to maximize the opportunities available to me in my final year of training without the worry of accumulating further debt. Without the struggle of securing funding, I have been able to participate in courses and conferences I otherwise might have missed.”

~ Johns Hopkins Neurosurgeon

“The best thing about the HCA Stipend Program is that it allows extra income to offset the need for increased moonlighting and for associated expenses incurred with medical licensing, testing, books and materials. It also makes us aware of HCA hospitals. It's a great program and I have recommended it to others.”

~ Ellis Doan, M.D., Internal Medicine Hospitalist, St. David's Medical Center

“I found the stipend program to be very financially helpful, especially during a time in my career when I was transitioning out of training and moving to a new city. The HCA folks were very informative and answered my questions in a timely manner.”

~ Ryan Meyer M.D., Pediatric Critical Care, Medical City, Dallas

“The HCA Resident/Fellow Stipend program is a great program. It has allowed me to moonlight less often during my last year of training and spend more time with family. The contract was straight-forward, easy to understand, and there are no hidden stipulations. I wish I had known about it sooner.”

~ Nikhil Joshi M.D., Interventional Cardiology, Scott & White Hospital

“The stipend allowed me to focus more on the final year of my electrophysiology fellowship (PGY-8) as I needed to moonlight less to support my wife and four children.

Furthermore, the job choices within the HCA system, even in a field as specialized as mine, were substantial. I ended up in the situation that I was looking for in the city that I wanted to live in. I highly recommend the program.”

~ David N. Kenigsberg M.D., Clinical Cardiac Electrophysiologist, University of Miami

“Right before my husband started his Fellowship he started to receive a stipend from HCA and it has helped us cover the month in between residency and fellowship when we had no paycheck at all! We were able to afford the cost of moving and storage for our things that wouldn't fit in our temporary apartment ...

Several times my husband and I have said there was no way we could have made it this past year without the stipend. So I just wanted to say thank you from myself, my husband and our two beautiful baby girls because HCA has made a tremendous difference in our lives during my husband's fellowship year.”

~ wife of a former Stipend Recipient

“I would like to thank HCA Healthcare for the great opportunity they offer in their resident/fellow Stipend program. Thanks to the monthly stipend, I was able to better focus on completing my training with confidence that my financial responsibilities had been addressed. Once I applied for the program, I was pleasantly surprised with how quickly HCA Healthcare responded and processed the paperwork such that I was receiving the stipend within just a short time. Again, I could not be more pleased with the Stipend program and highly recommend it to other residents and fellows.”

~ Shakil Khan, Cardiology/Non Invasive, Johns Hopkins University
